HOW DOES IT WORK?

Dean Vaughn Total Career Prep[®] uses **audionyms[™]** and **illogical associations** to make it **incredibly easy to remember medical terminology.**

pulmon- – pool/moon

WHAT IS AN AUDIONYM?

An audionym is a sound name – a sound-alike keyword (or keywords) for a medical element or word part we wish to remember.

-ectomy – egg/tomato

WHAT IS AN ILLOGICAL ASSOCIATION?

An illogical association is a familiar image that is altered “illogically” to link a medical word part to its meaning.

DEMONSTRATION

Medical Terminology by Body System teaches 275 medical elements – prefixes, roots, and suffixes – that combine to form thousands of complex medical terms.

For June 2024 - Completely new, updated illustrations throughout the video lessons and flashcards, and completely new interactive activities.

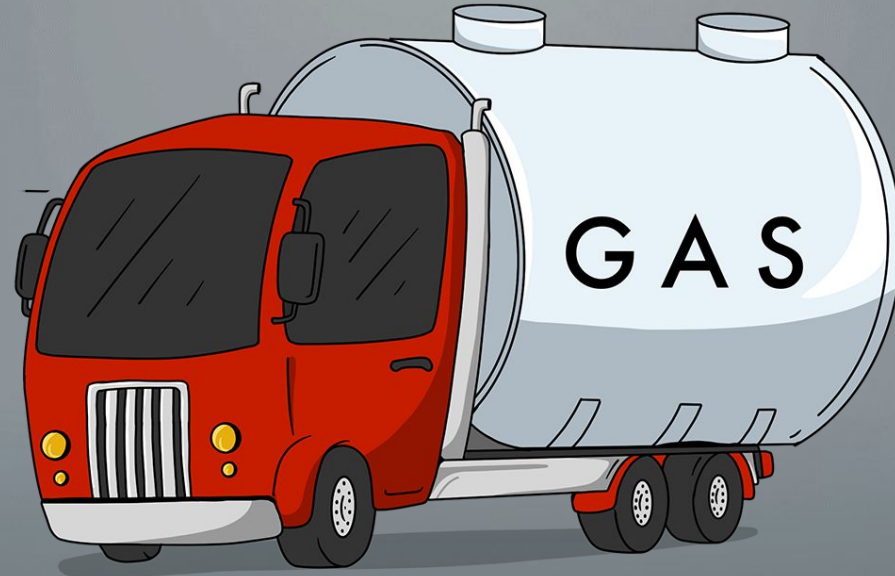

To demonstrate how the Dean Vaughn Career Prep® works, we will show you how to remember just two **medical elements** and the meaning of each.

**gastr-
-itis**

**stomach
inflammation**

gastr-

gas
truck

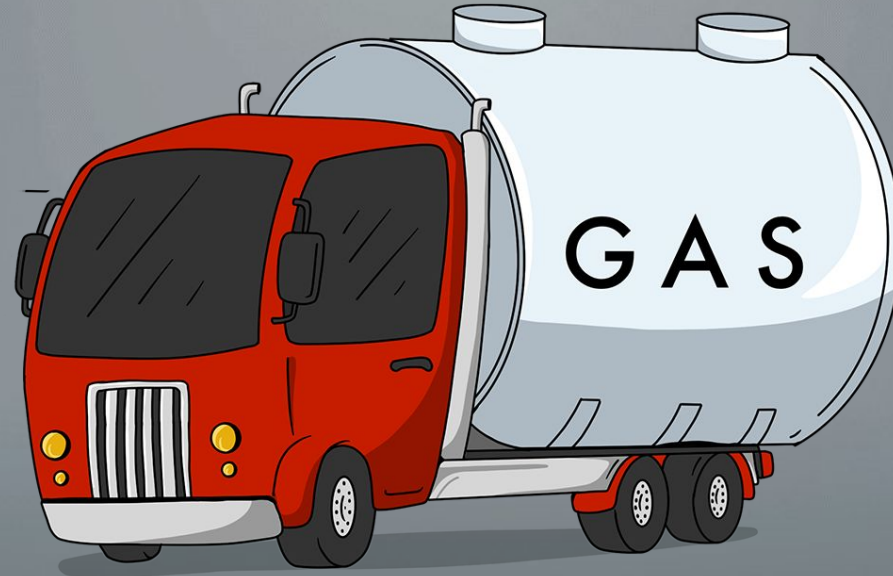

Let's begin.

An audionym for **gastr-** could be **gas truck**.

gastr- • **gas truck**

gastr-

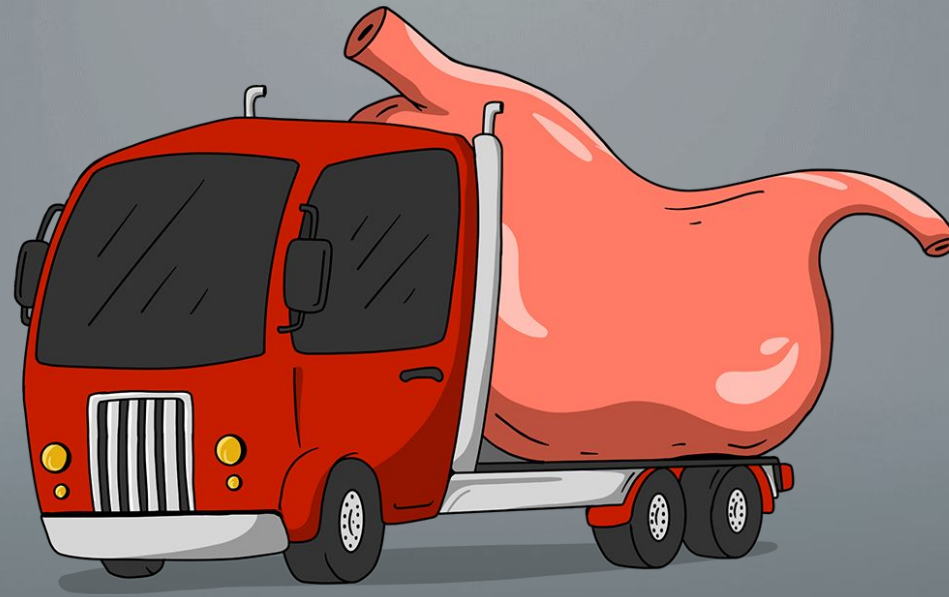

gas
truck

To make it easier to remember that **gastr-** means **stomach**, we'll change our **gas truck** into something that looks like this...

gastr-

gas
truck

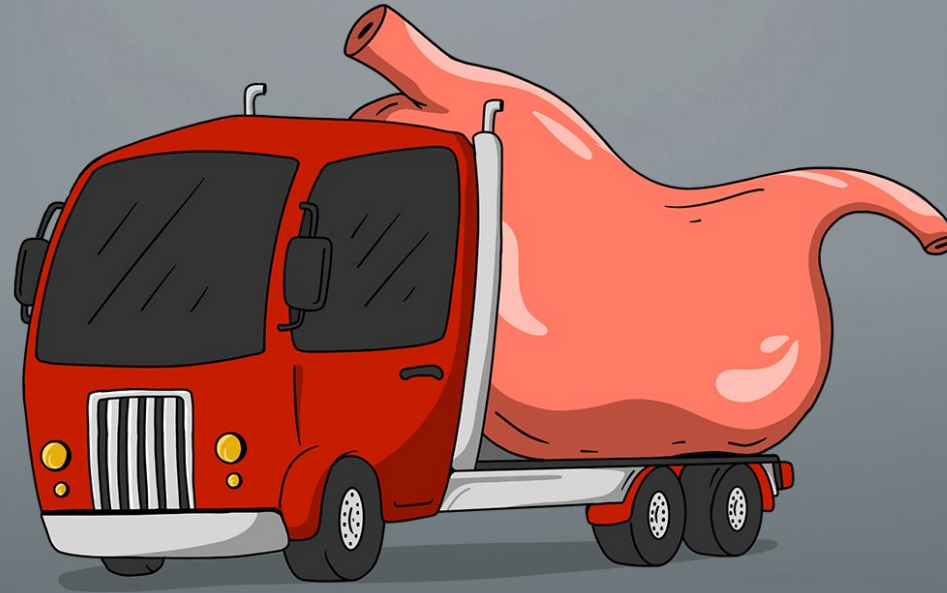

The **gas truck** has a stomach for a tank!
Can you imagine that?

gastr-

gas
truck

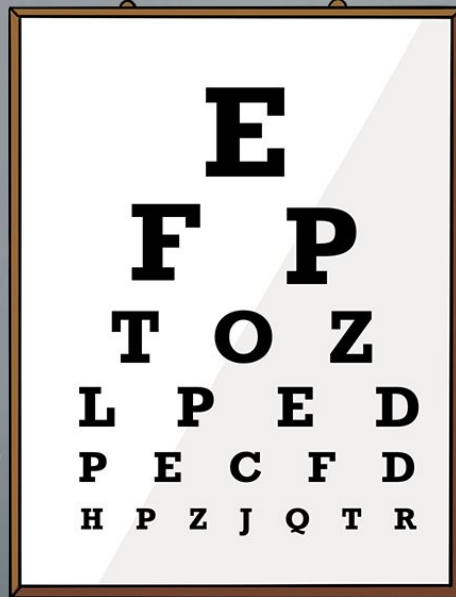

See the **gas truck** with a **stomach** for a tank and it will be easier to remember that **gastr-** means **stomach**.

stomach

-itis

eye test

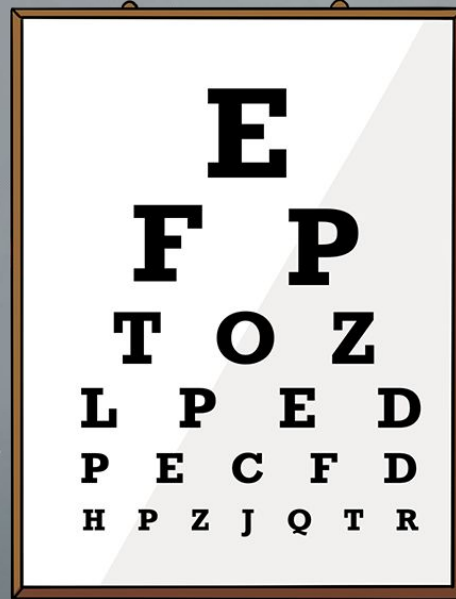

Next, the medical element **-itis**.

An audionym for **-itis** could be **eye test**.

-itis • eye test

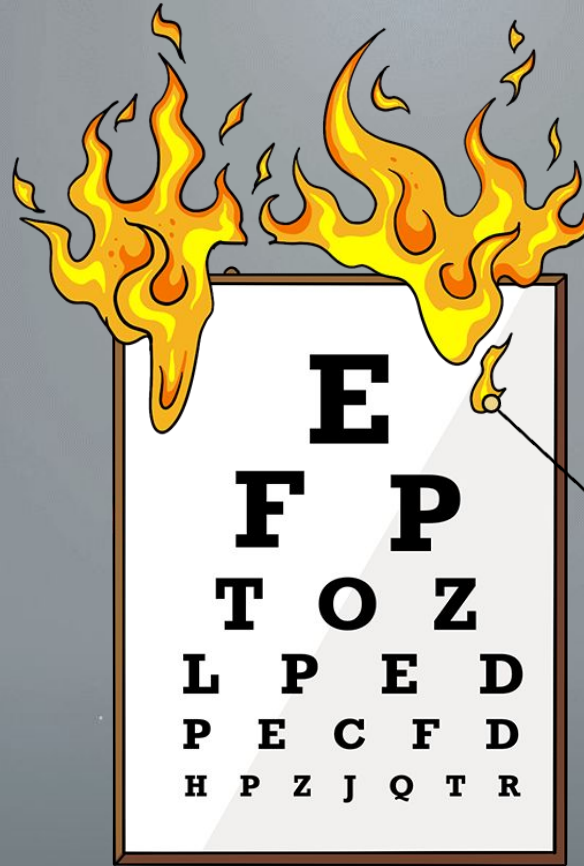

-itis

eye test

To help us remember that **-itis** means **inflammation**, we'll change the **eye test** to look like this...

-itis

eye test

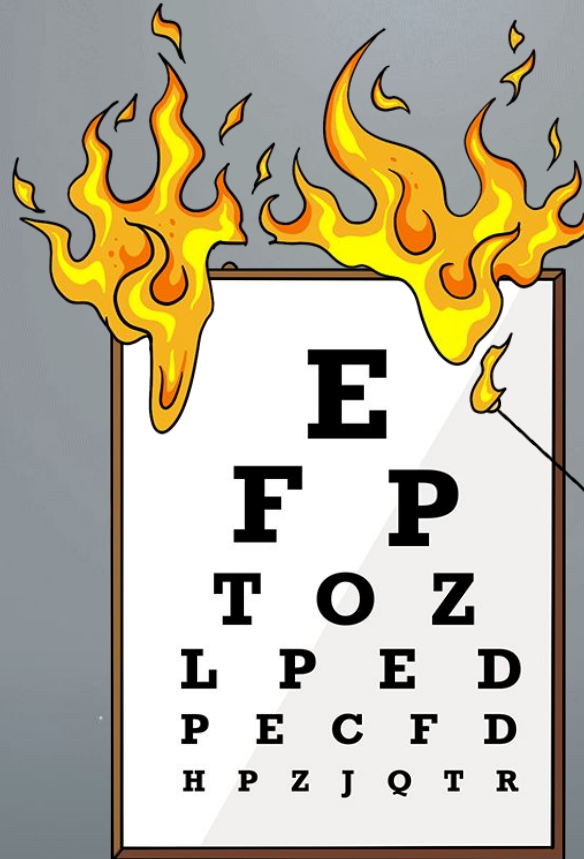

in flames

Suddenly the **eye test** is **in flames**! Have you ever seen anything like this?

-itis

eye test

See the **eye test in flames** and you will more easily remember that **-itis** means **inflammation**.
