

Fiddle sticks

Take Popsicle sticks and write 1 word or word part on each stick. Randomly place 1 color dot on some of the sticks. See colors below. Leave some blank. I do not provide the definitions so either someone in the group needs to know the answer or look it up. Worst case they ask me. I have them work in groups of 4. This may be on of multiple stations or if there is time that I give them to study or review this is an option the student can choose.

pull 1 stick

Notify other players if there is a colored dot on the stick

Read word part and define see variations below

Yellow – If you do not know the definition another player can give definition and steal all your sticks

Green - if you get the definition right you can steal all of the sticks from another player

Red – if you get the definition wrong you put all your sticks back in the cup.

Blue - Define the word part and state a word with the word part and it's definition.

If there is no dot – answer right and you keep the stick. Answer wrong put the stick back in the cup.

End of game the winner is whoever has the most sticks
